Subject: Application regarding urgent repair of broken water supply pipeline and electrical hazard at Boys' Hostel Block B.

Respected Sir,

I would like to bring to your kind notice an urgent infrastructure problem at **Padma Nath Gohain Baruah Chatra Nivas (Boys' Hostel Block B)**. The main 25mm GI water pipeline on the first floor washroom has severely ruptured, resulting in continuous water accumulation in the corridor and adjacent student rooms.

More critically, the water leakage is seeping into the main MCB electrical sub-distribution board outside Room 104, causing recurrent sparking and circuit tripping. This poses an immediate electrical and fire hazard to the resident students. The issue was logged on the campus grievance redressal portal (Ticket #DU-2026-0842) and has been endorsed by 48 resident students requesting urgent action.

In view of the serious inconvenience and safety risk to students, I earnestly request your kind approval to direct the **University Engineer (Planning & Construction Branch)** to conduct an immediate on-site inspection and carry out the necessary repair and electrical weatherproofing work on priority.

Thanking you.

Yours faithfully,

_____

Dr. H. K. Borah
