Subject: Application for installation of Commercial RO Drinking Water Station and Pathway Solar Lights along Central Library Walkway.

Respected Sir,

With due respect, I wish to submit a proposal for the installation of essential student amenities along the central academic corridor connecting the **Lakshminath Bezbaroa Central Library** and the **Centre for Computer Science and Applications (CCSA)**.

Presently, over 2,000 students and research scholars use this academic walkway daily. Due to the lack of purified drinking water facilities in this zone, students face acute difficulty during long study hours. Furthermore, the lack of sufficient pathway lighting poses security concerns for female students and scholars walking to and from the library during late evening hours. Over 340 students have formally petitioned for these facilities on the campus redressal portal.

In accordance with **NAAC Key Indicator 4.1 (Campus Facilities)** and UGC student welfare guidelines, I kindly request your favourable consideration to sanction the following installations:

- **1x Commercial RO Water Kiosk (500 LPH with UV sterilization)** near the Central Library forecourt entrance.
- **4x Integrated Solar LED Street Luminaires** along the pedestrian pathway between Library and CCSA.

Your kind approval for administrative and technical feasibility assessment by the Planning & Development Section will greatly benefit the entire university student community.

Thanking you.

Yours faithfully,

_____
